

Going Beyond the Basics

THE ADVANCED OBSTETRIC AND ANAESTHETIC SKILLS COURSE

Five days of evidence-based multidisciplinary practical training to improve maternal and newborn peri-operative outcomes

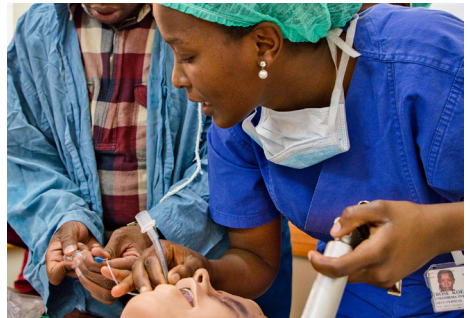

- Improving decisions for operative obstetric births
- Labour ward leadership and management
- Improving interdisciplinary communication skills
- Safe anaesthesia and surgery
- Enhanced surgical skills for routine and complex caesarean surgery
- Advanced skills in assisted vaginal delivery and perineal trauma repair
- Detection and management of post-operative complications
- Patient counselling skills
- Improving quality of care
- Audit
- Action planning

“This will translate into better care for the patients because we are being taught along internationally recognised best practice standards”

Specialist, Kenya

“A lot of eyes opened on new practices. ... I have a lot to take back and also teach other colleagues who were not in the training”.

Year 1 Registrar, Nigeria
