## INTERNATIONAL HEALTH CONSULTANCY

Join the innovators  
Lead the way  
Make an impact

**Our Certificate Programme in International Health Consultancy is underpinned by LSTM's vision and values to making a difference to health in resource-poor settings, through adopting a robust, ethical consulting model. This programme contributes to the global health agenda articulated in the UN Sustainable Development Goals.**

Our highly intensive, post-graduate professional development programme provides practising and emerging international health consultants with an opportunity to enhance and improve their knowledge and skills to deliver technical assistance that is robust, evidence-based and grounded in the reality of resource-poor settings.

## **Certificate Programme in International Health Consultancy**

The programme aims to mirror the reality of working as an international health consultant and has a very strong emphasis on developing practical hands-on skills with a focus on both individual and team working for delivering successful consultancies.

It is delivered through a student-centred approach, incorporating self-directed learning and face-to-face delivery. A unique element of the programme is the direct application of learning and skills through conducting a mentored consultancy assignment as part of a multi-disciplinary team in Merseyside.

*"This is a very high quality course and one of the best short courses I've attended. It is enormously practical, covering a wide range of relevant skills and tools for international health consultancy. This course is also really relevant to those in consultancy in Europe and the UK."*

**Professor John Ashton CBE  
Alumni 2012**

**Enhance your global health leadership skills
